ABOUT ME

I am a Computer Science graduate with an Honours degree and practical experience in ICT support, full-stack development, business administration and cybersecurity. I enjoy building useful software, solving technical problems and learning new technologies. I have worked with web development, networking, Windows and Linux systems, cybersecurity tools and AI research. My current research focuses on Artificial Intelligence and how AI can be applied to solve computing problems. I am looking to grow in software development, cybersecurity/SOC, AI/data, cloud or ICT.

WORK EXPERIENCE

Full-Stack Development Intern - Proxima Tech | July 2026 - September 2026

- I worked on full-stack software development and supported frontend and backend application tasks.
- I helped with debugging, testing, APIs, database integration and technical documentation.
- I used Git and GitHub to manage code and work with other team members.

Cyber Security Intern - MWR | Online | 02 March 2026 - 22 June 2026

- I completed an online cybersecurity internship where I developed practical knowledge of cyber security, networks and system protection.
- I strengthened my understanding of security operations, security tools, threats and safe computing practices.

ICT Intern | February 2026 - June 2026

- I supported users with computer, Windows and general ICT problems and helped troubleshoot technical issues.
- I assisted with networking, connectivity, computer systems and technical documentation.

Business Administration / Skills Development Professional Experience | 2022

- I completed practical business administration and skills development work as part of my NQF Level 4 programme.
- I gained experience in administration, workplace communication, organising information, record keeping and supporting day-to-day office activities.

Judge - Eskom Expo for Young Scientists

- I evaluated learner science and innovation projects and communicated feedback in a professional and fair way.

EDUCATION

BSc Computer Science Honours - University of Limpopo | 2025 | NQF Level 8

Bachelor of Science in Computer Science - University of Venda | 2023 | NQF Level 7

Business Administration / Skills Development Professional | 2022 | NQF Level 4

National Senior Certificate (Matric) - Funzwani Secondary School | 2020 | NQF Level 4

TECHNICAL SKILLS

Programming: Python, Java, JavaScript, TypeScript, HTML, CSS and SQL

Frontend: React, Tailwind CSS, Vite, React Router, TanStack Query, React Hook Form and Zod

Backend & Data: Node.js, Express, REST APIs, CRUD, PostgreSQL and database integration

Cybersecurity: Wazuh, Snort, pfSense, Nessus, Burp Suite, Active Directory, log analysis and vulnerability assessment

Systems & Networking: Windows 10/11, Windows Server 2022, Ubuntu, Kali Linux, TCP/IP, DNS, DHCP, NAT and firewalls

Tools: Git, GitHub, VS Code, npm, PowerShell, VirtualBox, VMware, Microsoft Word and Excel

AI & Research: Artificial Intelligence, deep learning, research methods, data preparation and model evaluation

RESEARCH

Artificial Intelligence Research

- My current research focuses on Artificial Intelligence and the use of AI methods to solve computing problems.
- I am developing practical research skills in data preparation, model development, experimentation and evaluation.
- I am studying AI concepts and research methods and learning how to evaluate and improve intelligent systems.

SELECTED PROJECTS

EduCore 360 - School Management System

- I built and developed a multi-role school management frontend using React, TypeScript, Vite and Tailwind CSS. It includes roles such as Super Admin, School Admin, Principal, HOD, Teacher and Student, together with dashboards, forms and management modules.

Hospital Management System

- I am developing a hospital management system with healthcare administration workflows, dashboards and role-based features.

Multi-Vendor E-Commerce Platform

- I designed customer, seller and administrator areas for products, search, cart, checkout, orders, returns, inventory, seller management and platform administration.

Property & Rental Management Platform

- I designed a property management system for landlords/property managers and tenants, including the main user interfaces and workflows.

Internal Ticketing System MVP

- I worked in a four-person team. I created the system plan and API contract, helped define user roles and the ticket lifecycle, and used GitHub pull requests for teamwork.

ANSU - Personal Desktop Assistant

- I built a Python-based Windows assistant that can respond to voice commands, show date/time, open and close applications and navigate folders.

Personal Developer Portfolio

- I built a professional multi-page portfolio to present my profile, skills, CV, certificates, projects, education and contact information.

CYBERSECURITY / SOC HOMELAB

- I built a virtual security lab with Windows Server 2022, Windows 11, Ubuntu Server, Kali Linux, pfSense and Wazuh.
- I configured virtual networks, NAT, static IP addresses and connectivity and practiced security monitoring and firewall configuration.
- I used Wazuh, Snort, Nessus, Burp Suite and OWASP Juice Shop and gained practical exposure to Active Directory.

SOFTWARE ENGINEERING

I have practical experience with requirements analysis, system planning, UI development, REST API planning, CRUD applications, database integration, testing, debugging, Git/GitHub, pull requests, technical documentation, deployment and SDLC concepts.

TRAINING & PROFESSIONAL DEVELOPMENT

- I attended Microsoft trainer development/class observation and learned about technical training delivery and learner engagement.
- I continue to develop my professional and technical skills through training, practical learning and hands-on experience.

CAREER INTERESTS

I am interested in Graduate or Junior Software Development, Full-Stack Development, Software Testing / QA, SOC / Security Operations, Junior Cybersecurity, ICT / IT Support, Data / AI and Cloud opportunities.
